

GDD 06

Body Lab Juniors

Explore the amazing you

The body-science game, retrofitted to the mechanic-embodiment standard. Children tap the body lab to reveal how it works, erase body myths (including colourism), stand up for a teased friend, and thank their amazing body. Eight mechanics, zero "tap the right card". Scorecard: passed.

Explore the amazing you.

Body Lab Juniors is the body-science game: children tap and explore a friendly body, learn how it works, and meet three big truths, we're mostly the same inside, every body outside is good, and bodies grow and change. It lands in the exact window (age 6+) when body dissatisfaction starts, and takes on India's deepest body myth, colourism, head-on. This is the v2 retrofit: the v1 library was 75% a single tap; the same body science and the colourism content now arrive through eight play actions.

FIELD	VALUE
Node / gameld	g06 · body-lab-juniors (confirm exact id against engine-host)
Chapter / ages	Chapter 2 · ages 6-9 · light canvas · increasingly solo
Thread / topics	A · Body & Growing Up · UNESCO 6.1-6.5
Prerequisite / builds on	Chapter 1 capstone · builds on g02 (My Body, My Rules)
Gating	Core
Schema / status	v2 · scorecard PASS retrofit from v1 (was 75% single-mechanic).

binary taps

The curious one, the teased one.

From the Chapter 2 personas. The game feeds curiosity AND protects the body image that, the research says, starts to wobble at exactly this age, and each persona's need maps to a v2 mechanic.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Reyansh, 7 (curious)	To feed his "how does it work?" hunger.	explore-label : tap the body lab, reveal facts.
Ananya, 8 (justice-seeker)	To know body science is for girls too.	strike-rewrite + branch : same inside; "all kids learn".
"Faizan"-type (teased about looks)	To hear his body is good; teasing is wrong.	role-play + branch : stand-up & body-kindness.
A darker-skinned child	To know fair isn't "better"; dark is beautiful.	strike-rewrite + branch : colourism busted directly.
Mrs. Pillai / Deepak (educators)	Science-accurate, shame-free body lesson.	explore-label + match : correct organs & systems.

Why this works (the evidence). Body dissatisfaction is measurable from around age 6 and is driven by media, teasing and adults' comments; body positivity, especially appreciating what the body does, is protective. So this game is science-as-play plus body-kindness, delivered before the dissatisfaction hardens.

Eight moves, one lab.

The rework's heart: the body truths arrive through eight actions, led by the lab's signature **explore-label** tap. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE CHILD DOES	EMBODIES	N
explore-label signature	Taps a body part; it lights up with a fun fact.	How the body works; curiosity.	12
strike-rewrite	Erases a body myth ("fair skin is better"), writes the truth.	Conceptual change; colourism.	17
reflect	Thanks their body / checks body-image kindly (no wrong answer).	Body positivity; metacognition.	17
branch	Chooses in a real moment (teased, "don't get dark", comparing).	Decisions; self-kindness; allyship.	10
match	Pairs organ to job, sense to action, signal to meaning.	Body systems; cause & effect.	9
role-play (voice)	Says kind body-thoughts; stands up for a friend.	Assertion; body-kindness.	8
sort	Same-inside vs different-outside; kind vs unkind.	Telling concepts apart.	7
build	Builds a care routine / "my amazing body" wall.	Self-care; functionality.	2

18 of 82 moments are branch or role-play; binary "tap the right answer": **0%**. No single mechanic exceeds **21%**.

The two-test, passed.

Is it fun?

Tapping a body to light up the heart, balloon the lungs, gurgle the tummy, is hands-on delight, the kind 6-9s love, and each tap reveals a fun fact ("your heart beats ~100,000 times a day"). Around it: erase a silly myth, thank your body, stand up for a friend, build your "amazing body" wall. Every screen a different action.

Is it teaching?

Yes, real body science (systems and senses) plus the body-image curriculum the research demands at this age: functionality-appreciation ("what your body does > how it looks"), same-inside / different-outside, and a direct strike at colourism. The child rehearses "my body is amazing, mine, and good as it is".

The belief it moves. From "boys' and girls' bodies are totally different; fair skin is better; my body should look like the screens; it's rude to ask how bodies work" → "we're mostly the same inside, every body and skin colour is good, bodies grow and change, and curiosity is a superpower."

Same truths, new actions.

82 scenarios across six categories, India-grounded (colourism / "don't get dark" / "fairer is prettier", busted with "Dark is Beautiful"). Every one re-encoded to a typed v2 mechanic.

CATEGORY	N	LEAD MECHANICS	COVERS
How my body works	16	explore-label, match	Heart, lungs, bones, muscles, brain, digestion, senses, signals.
Same inside	12	strike-rewrite, sort, branch	Boys & girls share heart, lungs, bones, brain; mostly the same.
Different outside, all good	18	strike-rewrite, branch, role-play	Size, skin colour (colourism), hair, ability; teasing; screens.
Bodies grow and change	12	explore-label, branch, match	Baby→now; own pace; gentle puberty on-ramp; not a race.
Curiosity is good	10	strike-rewrite, branch, reflect	Ask how bodies work; real names; science is for all.
My body is amazing & mine	14	reflect, role-play, build	Gratitude/function; kind self-talk; adverts sell worries.

An explore-label scenario (the lab's signature), verbatim.

```
hook: "Welcome to the Body Lab! Tap the chest."
parts: [ heart | brain | foot ]   find: "the part that beats and pumps blood"
answer: heart
reveal: "The heart pumps blood all around you, about 100,000 beats a day!"
relearn: "Your heart pumps blood all around you, all day, every day."
```

Full library: [SwipeEd — GDD 06 Body Lab Juniors — Scenario Library.json](#) (82 records, v2 schema).

What this game erases.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
Boys' and girls' bodies are completely different.	We're mostly the same inside; only a few parts differ.	Anatomy / similarities.
Fair skin is better / prettier.	Every skin colour is beautiful; fair isn't "better".	India colourism; Dark is Beautiful.
Don't get dark, dark skin is bad.	Darker skin is good; play happily and sun-safely.	India colourism.
There's one right body size.	Bodies come in all shapes and sizes, all good.	Body positivity.
Bodies should look like the ones on screens.	Real bodies are wonderfully varied.	Media & body image.
Your body stays the same forever.	Bodies grow and change, each at their own pace.	Growth & development.
It's rude to ask how bodies work.	Curiosity is good; that's how we learn.	Science curiosity.
Only some kids need to know how bodies work.	All kids should learn body science.	Science for all.
Your body needs products to be okay.	You're okay as you are; adverts sell worries.	Media literacy + body image.

The micro-loop.

1. **Hook.** Lensy, fascinated by human bodies: "ooh, what does THIS bit do?".
2. **Play.** One of eight mechanics, led by the explore-label tap, rotated.
3. **Reveal.** A tap lights up the organ with a kid-level fact.
4. **UN → RE moment.** On a myth, UN erases it and RE writes the truth ("fair is prettier" → "every skin colour is beautiful").
5. **Apply.** Thank your body, stand up for a friend, or sort same-inside vs varied-outside.
6. **Sticker.** The "body scientist" badge; GameDone records once.

Signature surfaces: the **explorable body lab** (systems light up on tap) and the **"my amazing body" wall**. Private parts are named respectfully and handed to g02's consent frame, not detailed here.

Wonder, not worry.

- **Register.** Ages 6-9: curious, science-y, body-positive; never clinical, never shaming.
- **Functionality over appearance.** Lead with what the body does; appearance is never ranked.
- **Colourism, head-on but gentle.** "Dark is beautiful" stated plainly; no tone is "better"; no lightening framing ever.
- **No comparison, no fear.** Growth isn't a race; the puberty on-ramp reassures, never alarms.
- **Scope discipline.** Private-part anatomy and detailed puberty live in later nodes; this is "how the body works + body kindness".
- **Access.** Audio-first, offline, large taps, colour never the only signal; Indian skin tones & bodies represented.

v2 schema, scorecard-gated.

- **gameld. body-lab-juniors** — node.game === GameDone key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema**. Each scenario carries type + typed payload. The bespoke **explore-label** type needs the explorable body asset (6 systems + senses) with diverse skin tones; the rest reuse the shared templates from g09.
- **Scorecard-gated**. Passed all eight checks (8 mechanics, max 21%, 0% binary, 18 autonomy, 17 UN→RE, multiple personas, 100% completeness). Re-run score_gdd.py on any edit.
- **Cross-links**. Shares body-name vocabulary with g02; feeds Chapter 3 puberty nodes.
- **Generated path**. Label/order/thread changes flow through the xlsx + gen-path, never hand-edited path.ts.

Ethics contracts (never traded for engagement): functionality over appearance; colourism countered never reinforced; no body fear or comparison; represent every body & skin tone; scope-disciplined; made-for-India.

Why this works.

- **Body image wobbles early.** Body dissatisfaction is measurable from around age 6 and rises through middle childhood (media, teasing, adults' comments), so 6-9 is the protective window, and appreciating function buffers it.
- **Kids can learn real body science.** 6-9s grasp organ systems and the senses through hands-on, relatable play, exactly the explore-label "lab" format.
- **India's colourism is a childhood harm.** Fair-skin bias is embedded from early childhood (favouritism, "don't get dark", a vast skin-lightening market) and damages self-esteem; the "Dark is Beautiful" frame is the evidence-based counter.

Citations accompany each scenario in the library JSON. Retrofit 3 of 9 (g01-08, g37) to the v2 standard; worst-offenders first. g06 was 75% single-mechanic and is now scorecard-clean.
