

GDD 15 Boundary Bot

My lines, your lines, respected

The consent-and-boundaries game for ages 9-12, built to the mechanic-embodiment standard. Children set their own boundaries, learn consent (ask, ongoing, revocable), respect others', resist peer pressure, and handle online sharing. Seven mechanics, 35 real-choice moments, zero "tap the right card". Scorecard: passed.

My lines, your lines, respected.

Boundary Bot is the consent-and-boundaries node for pre-teens, the deeper, 9-12 sequel to Safety Squad (g08). Children learn to set and hold their own boundaries, understand consent (a free yes, ongoing and revocable), read and respect others' boundaries, resist peer pressure with real scripts, and handle online sharing and requests, with telling-and-support if a boundary is crossed. New v2 build to the standard.

FIELD	VALUE
Node / gameld	g15 · boundary-bot (confirm exact id against engine-host)

Lines worth holding.

From the Chapter 3 personas. As friendships intensify and life moves online, the skills to set and respect boundaries become daily survival tools.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Diya, 11	To set and hold boundaries without guilt.	role-play + strike-rewrite: "no isn't rude".
Aarav, 12 (gaming, peer-driven)	To resist pressure and handle online sharing.	branch + spot: refusal scripts; online red flags.
Asha, 24 (peer educator)	To model believing & supporting a friend.	role-play + branch: support & tell.
A pressured kid	Exit lines and a way out, no shame.	branch + build: escape kit.
Every child	Consent as ask-listen-respect, both ways.	sort + reflect.

Why this works (the evidence). Bodily autonomy means everyone decides what happens to their body, so kids need to both set their own boundaries and respect others'. Peer pressure is normal and resistible with practised scripts, exit lines and a safe signal. And digital consent matters now: don't overshare, ask before posting others, and treat a request for private photos as a red flag, tell a trusted adult.

Seven moves, real lines.

The rework's heart: consent and boundaries arrive through seven actions, led by deciding real moments and rehearsing the words. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE CHILD DOES	EMBODIES	N
branch (dilemma)	Decides a real boundary/pressure moment, sees the result.	Autonomy; refusal; respect.	23
reflect	Names their own lines and rights (no wrong answer).	Self-awareness; rights.	19
strike-rewrite	Erases a boundary myth ("no is rude").	Conceptual change.	17
role-play (voice)	Says the boundary, the no, the ask, the support line.	Assertion; consent; allyship.	12
sort	Sorts respects-vs-crosses, consent-vs-not, share-vs-private.	Telling them apart.	7
spot	Finds the pressure tactic / online red flag.	Recognising manipulation.	4
build	Builds a pressure-escape kit / boundary toolkit / response plan.	Ready-to-use skills.	3

35 of 85 moments are branch or role-play, consent and boundaries are decided and rehearsed. Binary "tap the right answer": **0%**.

The two-test, passed.

Is it fun?

Boundary Bot is a wry, near-peer helper that hands you the lines you wish you'd had: the comeback to a guilt-trip, the exit from a dare, the calm "ask me first". The dilemmas are recognisable (the over-borrowing friend, the "everyone's doing it", the photo request), and nailing the assertive move feels powerful, the opposite of a finger-wagging consent lecture.

Is it teaching?

Yes, the pre-teen consent-and-boundaries curriculum: bodily autonomy and setting your own lines, consent as a free, ongoing, revocable yes, respecting others' boundaries, peer-pressure refusal skills, digital consent and oversharing, and how to tell and support if a boundary is crossed.

The belief it moves. From "no is rude; real friends pressure you; if you don't fight back it's your fault; what I post disappears; boys don't need to ask" → "my boundaries are healthy, consent is a free yes both ways, pressure is resistible, posts last, and everyone asks and respects."

Built, not bolted on.

85 researched scenarios across six categories, India-aware (peer pressure, shared-phone sharing, age-appropriate photo-request red flags). Full library in the companion JSON.

CATEGORY	N	LEAD MECHANICS	COVERS
Setting my own boundaries	14	role-play, strike-rewrite, sort	Body/space/time/stuff/emotional; set, hold, change; not rude.
Consent: ask, ongoing, can change	13	strike-rewrite, branch, sort	A free yes; revocable; everyday consent; stop means stop.
Reading & respecting others'	13	branch, role-play, spot	Ask first; accept a no; read cues; respect even close people.
Standing up to peer pressure	14	branch, role-play, build	Dares; "everyone's doing it"; exit lines; back a friend.
Online boundaries & sharing	16	strike-rewrite, branch, spot	Oversharing; ask before posting; photo-request red flag; passwords.
When a boundary's crossed	15	branch, role-play, build	Name-leave-tell; never your fault; support a friend; Childline 1098.

A branch scenario (online boundary), verbatim.

hook: "An online 'friend' keeps pushing you to share a private photo."

option A "Refuse, block if needed, tell a trusted adult" -> safe; that pressure is a serious red flag [

option B "Send it so they stop asking" -> never send private photos; refuse and tell

debrief: "Anyone pressuring you for private photos is unsafe, refuse and tell."

What this game erases.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
Saying no / setting a boundary is rude.	Boundaries are healthy and respectful.	Boundaries.
No 'no' means yes.	Consent is a clear yes; silence isn't agreement.	Consent.
Once you say yes, you can't change your mind.	Consent is ongoing; you can change your mind any time.	Consent.
Real friends pressure you to fit in.	Real friends respect your no; pressure is a red flag.	Peer pressure (links g09).
Saying no makes you weak or boring.	Saying no to what's wrong for you is strong.	Refusal skills.
What I post online disappears.	Posts can be saved, copied and last forever.	Digital footprint.
Sharing my address/routine online is fine.	Keep private info private; oversharing reaches the wrong people.	Oversharing.
If I didn't fight back, it's my fault.	Freezing is normal; a crossed boundary is never your fault.	Non-blame.
Boys should just 'go for it' without asking.	Everyone, all genders, asks and respects consent.	Consent / gender.

The micro-loop.

1. **Hook.** Boundary Bot pings: "incoming boundary moment, what do you do?".
2. **Play.** One of seven mechanics, led by a decision or a say-the-line, rotated.
3. **Result.** A branch shows what the boundary move does, with a debrief, no buzzer.
4. **UN → RE moment.** On a myth, UN erases it and RE writes the truth ("no is rude" → "boundaries are healthy").
5. **Apply.** Build the escape kit, say the refusal, or plan the tell-and-support.
6. **Sticker.** The Boundary Bot badge; GameDone records once.

Signature surfaces: the **say-the-line** rehearsal, the **pressure-escape kit**, and a **spot-the-red-flag** beat (offline & online). Builds on Safety Squad's No-Go-Tell; pairs with Friend or Frenemy (g09).

Empower, never frighten.

- **Register.** Ages 9-12, near-peer and matter-of-fact; the wry helper tone, never preachy or fear-based.
- **Both ways.** Equal weight on setting your own boundaries AND respecting others', consent is mutual.
- **Safe to be wrong.** "If you gave in once" and "if you froze" are met with self-compassion, never blame; a crossed boundary is never the child's fault.
- **Online, real but not lurid.** The photo-request red flag and "tell a trusted adult" are taught clearly and calmly, without graphic detail.
- **Gender-inclusive consent.** "Everyone asks and respects" explicitly includes boys, linking the healthy-masculinity thread.
- **Route to help.** Crossed boundaries route to a trusted adult and Childline 1098; private/solo per Chapter 3.

v2 schema, scorecard-gated.

- **gameld. boundary-bot** — node.game === GameDone key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema.** Each scenario carries type + typed payload (branch.options, role-play.yourLine, strike-rewrite.myth, sort.items/bins/key, spot.scene, build.pieces/sequence, reflect.options). Reuses the shared templates from g09.
- **Scorecard-gated.** Passed all eight checks (7 mechanics, max 27%, 0% binary, 35 autonomy, 17 UN→RE, 4 personas, 100% completeness). Re-run score_gdd.py on any edit.
- **Cross-links.** Builds on g08 (No-Go-Tell) and g02 (bodily autonomy); shares online-safety with g12; feeds Ch.4 consent/relationship nodes.
- **Generated path.** Label/order/thread changes flow through the xlsx + gen-path, never hand-edited path.ts.

Ethics contracts (never traded for engagement): empower never frighten; boundaries both ways; never imply child fault; online red flags taught calmly; gender-inclusive consent; route to a trusted adult/1098; made-for-India.

Why this works.

- **Bodily autonomy, both directions.** Everyone has the right to decide what happens to their body; the teachable skills are setting/holding/changing your own boundaries and asking-and-respecting others', practised through role-play.
- **Peer pressure is resistible.** Feeling pressured is normal; assertive refusal scripts, exit lines and a safe signal, rehearsed, build the confidence to say no, which is why branch and role-play lead.
- **Digital consent is now.** Pre-teens face oversharing and pressure to share photos; the protective habits are guarding private info, asking before posting others, and treating a private-photo request as a red flag to refuse and report.

Citations accompany each scenario in the library JSON. 17 games now v2. Next in Chapter 3: Crossroads (g16, decisions & consequences).
