

GDD 22

Plan It

Pregnancy follows clear rules

The fertility, pregnancy and contraception game for ages 12-15, a gated, values-first node. It deepens The Amazing Journey into the teen questions: when pregnancy can actually happen, the dangerous myths, how it's prevented, and why waiting is fully valid. Its heart is a "Plan It" life-sim. Seven mechanics, 21 myth-flips, zero "tap the right card". Scorecard: passed.

Pregnancy follows clear rules.

Plan It is the curriculum's first real look at pregnancy prevention, for ages 12-15. It deepens The Amazing Journey (g14) into the questions that matter for a teenager: when pregnancy can actually happen, how dangerous myths trip people up, how it's prevented, and how planning protects the future you want. The framing is values-first: not having sex yet is a completely valid, respected choice, and the heart is a "Plan It" life-sim where choices ripple forward. New v2 build, gated.

FIELD	VALUE
Node / gameld	g22 · plan-it (confirm exact id against engine-host)
Chapter / ages	Chapter 4 · ages 12-15 · real / values-first · private
Thread / topics	F · Sexual & Reproductive Health · UNESCO 6.2, 8.1
Prerequisite / builds on	g39 (Bounce) · builds on g14 (The Amazing Journey)
Gating	Gated (school-comfort toggle)
Schema / status	v2 · scorecard PASS the gated SRH-planning game.

Gated & values-first. This node sits behind the school-comfort toggle. It leads with the truth that **not having sex is the only fully reliable choice and is completely valid and respected**, the common, healthy choice at this age. It gives accurate facts (which the evidence shows help teens wait and stay safer, never encouraging earlier sex), keeps contraception at an age-appropriate overview level, stays non-judgmental and non-explicit, and routes real questions to a doctor or trusted adult.

Facts that protect a future.

From the Chapter 4 personas. At 12-15, teens hear a lot of confident myths and pressure; accurate facts plus a respected "you can wait" keep them safe and in charge of their plans.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Riya, 15	Facts over rumours, and a firm, kind way to hold her pace.	strike-rewrite + role-play : bust myths; "I'm not ready".
Veer, 14	To know waiting is normal and "everyone's doing it" is a myth.	strike-rewrite : most teens wait.
The Counsellor	A clear route to a doctor or trusted adult for real facts.	role-play + branch : ask, verify.
Every teen	To plan a future their choices actually protect.	branch + build : the Plan It life-sim.

Why this works (the evidence). Pregnancy can happen any time sperm meets egg, including the first time and (less likely) during a period; withdrawal and douching are unreliable and orgasm isn't required, common myths that endanger teens. Not having sex is the only fully reliable way to avoid pregnancy and is a completely valid choice; condoms prevent pregnancy and STIs, and other methods exist that a doctor can explain. Crucially, high-quality sexuality education delays sexual initiation and increases protection use, it does not encourage earlier sex, so accurate facts are a protection, not a push.

Seven moves, led by the flip.

Teen pregnancy risk is driven by confident myths, so **strike-rewrite** leads (the UN/RE engine), with **sort** separating fact from rumour and the **branch** "Plan It" life-sim modelling how choices ripple. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE TEEN DOES	EMBODIES	N
strike-rewrite (myth-flip) signature	Flips a dangerous fertility myth ("can't the first time" → you can).	Conceptual change.	21
sort	Sorts fact vs myth; reliable vs unreliable; trusted vs rumour source.	Telling fact from fear.	16
reflect	Considers readiness, own reasons, and that waiting is valid.	Values; agency.	15
branch (Plan It)	Charts goals and sees how today's choice ripples forward.	Planning; consequence.	11
role-play (voice)	Holds a pace, refuses pressure, asks a doctor.	Assertion; help-seeking.	9
build	Builds the reproduction chain, an options summary, a future plan.	The facts, by hand.	7
match	Pairs a term/method to its plain fact; a question to its source.	Accuracy.	6

21 myths flipped, 20 branch/role-play. Binary "tap the right answer": **0%**.

The two-test, passed.

Is it fun?

Plan It plays as a myth-busting facts game wrapped around a life-sim: you debunk the confident locker-room "facts", then step into a Plan It map where you set a goal and watch how each choice ripples toward, or away from, the future you want. The agency of charting your own path, plus the small thrill of catching a dangerous myth, makes a serious topic genuinely playable.

Is it teaching?

Yes, and carefully: when pregnancy can happen, why the dangerous myths are false, that waiting is fully reliable and respected, that other methods exist (overview, doctor-explained), and that planning protects a future, all sourced and values-first.

The belief it moves. From "you can't get pregnant the first time; pulling out is safe; everyone's doing it; waiting means something's wrong with me; learning this is pressure" → "pregnancy follows clear rules; the myths are false and dangerous; waiting is valid and common; accurate facts protect me; my choices plan my future."

Built, not bolted on.

85 researched scenarios across the how → myths → prevent → delay → plan → facts arc, verified and values-first. Full library in the companion JSON.

CATEGORY	N	LEAD MECHANICS	COVERS
How pregnancy happens	13	build, sort, match	Sperm + egg, the fertile window, when it's possible.
Bust the dangerous myths	15	strike-rewrite, sort	First time, during period, withdrawal, douching, "too young".
Ways it's prevented	14	sort, match, strike-rewrite	Waiting (fully reliable), condoms + STIs, options overview.
Delaying is valid	15	role-play, strike-rewrite	"Not ready", "everyone's doing it" myth, your pace.
Plan your future	12	branch, build, reflect	The life-sim; goals; choices ripple; protect the dream.
Get the facts, not rumours	16	sort, role-play, strike-rewrite	Doctor/trusted adult over rumour; porn isn't sex-ed.

A fertility myth-flip + a hold-your-pace line, verbatim.

flip: "You can't get pregnant the first time."
 UN -> "You can't get pregnant the first time."
 RE -> "Pregnancy is possible the very first time, every time carries a chance."

role-play: pressure = "everyone's doing it"
 best: "Not everyone is, and I'm not ready, that's my call."

What this game flips.

MYTH (UN ERASES)	FACT (RE WRITES)	BASIS
You can't get pregnant the first time.	Pregnancy is possible the very first time; every time carries a chance.	Verified.
You can't get pregnant during a period.	Less likely, but still possible, especially with irregular cycles.	Verified.
Pulling out reliably prevents pregnancy.	Withdrawal is unreliable; fluid before climax can carry sperm.	Verified.
Washing or douching afterwards stops it.	It does not; sperm can already be on the way.	Verified.
A teen's body is too young to get pregnant.	Once puberty begins, pregnancy is biologically possible.	Fertility.
Everyone my age is having sex.	Most teens this age are not; "everyone is" is a myth.	Norms.
Waiting means something's wrong with me.	Waiting is healthy, common and smart; nothing is wrong.	Pace.
Learning this is pressure to have sex.	Knowing the facts helps people wait and stay safer.	CSE evidence.

The micro-loop.

1. **Hook.** Lensy: "here's a confident 'fact' going round, true, or dangerous myth?".
2. **Play.** Flip a myth, sort fact from rumour, or chart a Plan It life-sim choice, rotated.
3. **The flip.** On a myth, UN strikes it and RE writes the verified fact ("first time is free" → it isn't).
4. **Values-first.** Waiting is repeatedly affirmed as fully reliable and respected; pressure lines get a calm refusal.
5. **Route to facts.** Real questions surface a doctor or trusted adult; rumours and porn are flagged as unreliable.
6. **Sticker.** The Plan It badge; GameDone records once.

Signature surface: the **Plan It life-sim** (set a goal, see choices ripple) and the **myth-flip card**. The myth-flip engine is shared across the SRH and gender threads; the consent/refusal lines link forward to Green Light / Red Light (g24).

Values-first, accurate, gated.

- **Gated.** Sits behind the school-comfort toggle; respects family and school readiness.
- **Waiting leads.** Not having sex is presented as fully reliable, valid and common, never as second-best.
- **Accurate, not encouraging.** Facts are framed as protection; the evidence is explicit that good information helps teens wait and stay safer.
- **Age-appropriate & non-explicit.** Contraception is an overview ("methods exist, a doctor explains them"), not a procedural how-to; nothing graphic.
- **Shared responsibility & consent.** Prevention is both partners' job; pressure lines link to consent and refusal (g24).
- **Route to real facts.** Doctors, health workers and trusted adults are the sources; rumour and porn are named as unreliable.
- **Access.** Audio-first, private, offline; India-grounded; pairs with The Amazing Journey (g14) and Defenders of the Body (g20).

v2 schema, scorecard-gated.

- **gameld. plan-it** — node.game === GameDone key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema**. type + typed payload; **strike-rewrite** leads, with the **branch** Plan It life-sim and **sort** fact/rumour board.
- **Gating**. gating = "Gated" (school-comfort); the engine must honour the toggle.
- **Fact-checked content**. Fertility facts/myths and the CSE-evidence framing verified against current medical sources; flag medical edits for re-verification.
- **Scorecard-gated**. Passed all eight checks (7 mechanics, strike-rewrite at 25%, 0% binary, 20 autonomy, 21 UN→RE, 4 personas, 100% completeness). Re-run score_gdd.py on any edit.
- **Tracked**. sync_master_tracker.py marks g22 v2 PASS in the Master Node Table.
- **Generated path**. Label/order/thread changes flow through the xlsx + gen-path, never hand-edited path.ts.

Safety contracts (never traded for engagement): gated; waiting leads and is respected; accurate not encouraging; age-appropriate and non-explicit; shared responsibility; facts from doctors/trusted adults; made-for-India.

Why this works.

- **Dangerous myths are the real risk.** Because "you can't the first time", "pulling out is safe" and "during a period is safe" are widespread and false, busting them with verified facts is the most protective thing the game can do, so myth-flipping leads.
- **Accurate facts help teens wait.** High-quality sexuality education delays sexual initiation and increases protection use, it does not encourage earlier sex, which is why the game can be both values-first (waiting leads) and fully factual.
- **Planning turns facts into agency.** The Plan It life-sim connects today's choices to tomorrow's goals, so prevention and waiting feel like the teen's own plan, not a rule imposed on them.

Sources: fertility & contraception myth/fact references (first-time, period, withdrawal, douching); WHO/ACOG/AAP evidence that comprehensive sexuality education delays initiation and increases protection use without encouraging sex. Citations accompany each scenario in the library JSON. 26 games now v2. Next in Chapter 4: Outbreak: Stop the Spread (g23).
