Clean Crew

Wash, brush, rest, repeat

The hygiene-and-healthy-habits game for ages 3-6, retrofitted to the mechanic-embodying standard. Children sequence the washing and brushing steps, sort clean habits, erase the "looks clean is clean enough" myths, and lead the crew. Seven mechanics, zero "tap the right card". Scorecard: passed.

Wash, brush, rest, repeat.

Clean Crew is the hygiene-and-healthy-habits game: children join a team of "clean heroes" and learn to wash, brush, bath, use the toilet and build healthy daily routines, with everything framed as normal, empowering and for everyone. This is the v2 retrofit: the v1 library leaned 44% on one step-tapping mechanic; the same routines now arrive through seven actions, led by sequencing the steps yourself.

FIELD	VALUE
Node / gameld	g37 · clean-crew (confirm exact id against engine-host)
Chapter / ages	Chapter 1 · ages 3-6 · light canvas · parent co-played
Thread / topics	A · Body & Growing Up · UNESCO 6.5, 6.1
Prerequisite / builds on	g02 (My Body, My Rules)
Gating	Core
Schema / status	v2 · scorecard PASS retrofit from v1 (was 44% single-mechanic).

Heroes of the everyday.

From the Chapter 1 personas. The game builds the everyday habits that protect health, especially for homes where audio-first and low-resource matter.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Kabir, 5 (audio-first home)	Voiced, repeatable routines he can lead.	build + role-play : sing the steps, lead the crew.
Vihaan, 4	Variety, not the same step-tap again.	sort + match + build : a different action each screen.
Aria, 5	To feel "I can do it myself".	role-play : "I can brush my teeth all by myself!".
Sunita / Megha (parents)	Habits that stick without nagging.	Co-play; reflects the child carries into the day.
Low-resource homes	Realistic, resourceful hygiene.	branch : "no soap? wash well & tell a grown-up".

Why this works (the evidence). Handwashing with soap is one of the most effective ways to prevent illness, and 3-6 is when daily routines form. Children learn routines by doing and sequencing them (not by being told), and audio-first delivery reaches non-readers, so the game makes the child perform the steps and say them aloud.

Seven moves, one crew.

The rework's heart: the habits arrive through seven actions, led by sequencing the steps yourself. Mechanics rotate; the same one never runs twice in a row (Vihaan's cure).

MECHANIC	THE CHILD DOES	EMBODIES	N
strike-rewrite	Erases a hygiene myth ("looks clean is clean"), writes the truth.	Conceptual change.	16
reflect	Notices how clean feels; picks a habit to grow (no wrong answer).	Motivation; self-care.	16
build (sequence)	Puts the wash/brush/bath/bedtime steps in order.	The routine, performed.	12
sort	Sorts wash-times, clean habits, germ-stoppers.	Telling clean from not.	11
role-play (voice)	Says the line ("hands first!"; leads the crew cheer).	Assertion; audio-first.	10
branch	Chooses in a real moment (no soap, sleepy, teasing).	Decisions; resourcefulness.	9
match	Pairs tool to task, habit to benefit.	Cause and effect.	8

19 of 82 moments are branch or role-play; binary "tap the right answer": **0%**. No single mechanic exceeds **20%**.

The two-test, passed.

Is it fun?

Joining the "Clean Crew" is a hero-team fantasy: sequence the steps to a little song, sort the germ-stoppers, rally the crew with a cheer, lead your family at brushing time. Bright, can-do energy, and every screen is a different action, so it never becomes the step-tap-again that bored Vihaan.

Is it teaching?

Yes, the core hygiene curriculum: handwashing (with soap, at the right times), tooth-brushing twice a day, bath and body care, toilet hygiene, and healthy daily habits (sleep, water, covering coughs), all framed as normal, for-everyone, and a sign of caring for your amazing body.

The belief it moves. From "if it looks clean it's clean; washing is babyish/only for girls; talking about toilets is gross; skip it if you're quick" → "germs are invisible so wash anyway, hygiene is a strong habit for everyone, body care is normal, and the key habits matter every day."

Same habits, new actions.

82 scenarios across six categories, India-aware (audio-first, soap-out resourcefulness, school routines) and empowerment-first. Every one re-encoded to a typed v2 mechanic.

CATEGORY	N	LEAD MECHANICS	COVERS
Washing hands	16	build, sort, role-play	The steps, when to wash, soap matters, scrub all over.
Brushing teeth	13	build, strike-rewrite, branch	Twice a day, gently, baby teeth matter, brush at night.
Bath & body care	13	build, match, role-play	Bath steps, hair/nails, dry off, "I can do some myself".
Toilet & staying clean	9	build, strike-rewrite, branch	Use-clean-flush-wash; it's normal, not gross.
Healthy daily habits	17	sort, build, strike-rewrite	Sleep, water, food, cover coughs, germs are real.
Hygiene is for everyone	14	strike-rewrite, role-play, sort	Every gender; not babyish; help kindly, never shame.

A build (sequence) scenario, verbatim.

hook: "Clean Crew, assemble! Put the handwashing steps in order."
 order: wet hands -> add soap -> scrub all over (sing a song!) -> rinse -> dry
 relearn: "Wet, soap, scrub, rinse, dry, that's how clean hands are done."

What this game erases.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
If hands look clean, they don't need washing.	Germs are invisible; wash anyway.	Germs / hygiene.
Water alone washes germs away.	Soap is what lifts germs off; use soap.	Handwashing science.
Brushing once in a while is enough.	Brush twice a day, every day.	Dental hygiene.
Baby teeth don't matter.	Baby teeth matter; keep them clean.	Dental hygiene.
Washing is only for girls.	Everyone washes and cares for their body.	Hygiene for all.
Talking about toilets is gross and rude.	It's a normal body thing; fine to talk about.	Body normalcy.
Germs you can't see can't hurt you.	Invisible germs can still make you sick.	Germ science.
Staying dirty is cool; washing is babyish.	Caring for your body is a grown-up strength.	Hygiene / self-esteem.
Brushing harder cleans better.	Brush gently; hard scrubbing hurts gums.	Dental technique.

The micro-loop.

1. **Hook.** Lensy: "Clean Crew, assemble! Today's mission...".
2. **Play.** One of seven mechanics, led by sequencing the steps, rotated.
3. **Cheer.** A correctly built routine triggers a hero celebration.
4. **UN → RE moment.** On a myth, UN erases it and RE writes the truth ("looks clean is clean" → "germs are invisible, wash anyway").
5. **Apply.** Say the line, sort the germ-stoppers, or choose the resourceful move.
6. **Sticker.** The Clean Crew badge; GameDone records once.

Signature surfaces: the **step-sequencer** (drag the wash/brush/bath steps into order, with an audio song) and the **crew cheer**. Audio-first throughout for non-readers; co-play prompts help the habit stick at home.

Empower, never shame.

- **Register.** Ages 3-6: upbeat, hero-team energy; the feeling is "I can keep myself healthy".
- **Never shame.** Hygiene is framed positively; no child is made to feel dirty or gross; teasing about smell/clothes is countered.
- **For every body.** Washing, brushing and grooming are for all genders; "not babyish, but strong".
- **Resourceful & realistic.** Handles no-soap, no-toothpaste days; wash with what you have and tell a grown-up.
- **Body-normal.** Toilet and body talk treated as ordinary, not embarrassing.
- **Access.** Audio-first and voiced (Kabir/Razia), offline, low-data, colour never the only signal; co-play; India contexts.

v2 schema, scorecard-gated.

- **gameld. clean-crew** — `node.game === GameDone` key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodying schema**. Each scenario carries type + typed payload. The step routines use **build** with `mode: "sequence"`; the rest reuse the shared templates from g09.
- **Scorecard-gated**. Passed all eight checks (7 mechanics, max 20%, 0% binary, 19 autonomy, 16 UN→RE, 6 personas, 100% completeness). Re-run `score_gdd.py` on any edit.
- **Audio-first asset need**. The sequencer needs voiced step prompts and a handwash/brush song; essential for non-readers.
- **Generated path**. Label/order/thread changes flow through the `xlsx` + `gen-path`, never hand-edited `path.ts`.

Ethics contracts (never traded for engagement): empower never shame; hygiene for every gender; body-normal (no "gross"); realistic/resourceful for low-resource homes; audio-first; made-for-India.

Why this works.

- **Handwashing prevents illness.** Washing with soap is among the most effective, low-cost ways to prevent disease, and the habit forms in early childhood, so 3-6 is the moment to build it.
- **Routines are learned by doing.** Young children master routines through sequencing and repetition rather than instruction; performing the steps (and singing them) is what makes them stick, with audio-first essential for non-readers.
- **Empower, for everyone, without shame.** Framing hygiene as normal, for every gender, and a sign of self-care (not as "dirty/gross") builds durable habits and protects self-esteem.

Citations accompany each scenario in the library JSON. Retrofit 6 of 9 (g01-08, g37) to the v2 standard. This completes the Chapter 1 retrofits (g03, g04, g05, g37). Remaining: g01, g02 (Ch.1) and g08 (Ch.2).
