

GDD 08

Safety Squad

Spot it, act on it, tell someone

The personal-safety game for ages 6-9, retrofitted to the mechanic-embodiment standard. Children decide real safety dilemmas, rehearse "No, Go, Tell", spot tricky-people and online red flags, and build their trusted-adults squad. Seven mechanics, thirty-two real-choice moments, zero "tap the right card". Empowering, never frightening. Scorecard: passed.

Spot it, act on it, tell someone.

Safety Squad is the personal-safety game: children join a team of safety heroes and rehearse the skills that prevent harm, safe vs unsafe touch, secrets vs surprises, a trusted-adults squad, "No, Go, Tell", tricky-people, getting help when lost, and online safety. It carries My Body, My Rules (g02) into the wider world, including online. This is the v2 retrofit, the last of the nine: the v1 was the closest to passing but leaned 41% on one mechanic and had no hooks; it's now a clean seven-mechanic build.

FIELD	VALUE
Node / gameld	g08 · safety-squad (confirm exact id against engine-host)
Chapter / ages	Chapter 2 · ages 6-9 · light canvas · co-play encouraged
Thread / topics	B · Safety, Consent & Boundaries · UNESCO 4.1, 4.2, 4.3, 3.3, 5.5
Prerequisite / builds on	g07 (What Makes Me, Me) · builds on g02 (My Body, My Rules)
Gating	Core · a life-safety node.
Schema / status	v2 · scorecard PASS retrofit from v1 (was 41% single-mechanic, no hooks).

Childline

Every child, kept safe.

From the Chapter 2 personas. Safety skills protect every child, and matter most for the quietest, who find telling hardest.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Reyansh, 7 (online-curious)	Online red flags and what to do.	spot + branch: private info; people pretend; tell.
Ananya, 8 (justice-seeker)	To know telling isn't tattling.	strike-rewrite + sort: safety-telling vs tattling.
"Faizan"-type	That he can say no, even to grown-ups.	role-play: "No, Go, Tell"; refuse unsafe asks.
A quieter, shy child	Permission and a plan to tell.	branch: keep telling till someone helps.
Parents / educators	Accurate, calm, non-scary tool.	Co-play; safe/unsafe language; Childline 1098.

Why this works (the evidence). Most who harm children are known and trusted, so the game teaches "tricky people" (watch behaviours) over "stranger danger", and "safe/unsafe" over "good/bad" touch to remove blame. Children 6-9 learn safety through concrete examples, role-play and repetition, exactly the squad-drills format.

Seven moves, one squad.

The rework's heart: safety arrives through seven actions, led by deciding real dilemmas and rehearsing the moves, not tapping a quiz. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE CHILD DOES	EMBODIES	N
branch (dilemma)	Chooses in a real safety moment, sees the result.	Decisions; No-Go-Tell; resourcefulness.	21
reflect	Checks the 'uh-oh' feeling; affirms the plan.	Body cues; preparedness.	17
strike-rewrite	Erases a safety myth, writes the truth.	Conceptual change.	13
role-play (voice)	Rehearses "No, Go, Tell" and the telling words.	Assertion; disclosure.	11
sort	Safe/unsafe, secret/surprise, private info.	Telling concepts apart.	10
spot (spot-the-trick)	Finds the red flag / lure / online trick.	Recognising danger cues fast.	9
build	Builds the trusted-adults squad & the plans.	The safety network, made concrete.	3

32 of 84 moments are branch or role-play, because safety is a skill you rehearse. Binary "tap the right answer": **0%**.

The two-test, passed.

Is it fun?

Joining the "Safety Squad" is a hero fantasy: earn your badge, run the drills, spot the trick, make the call, become someone's safe helper. Bright, calm, mission-y energy, with a different action on every screen, so it feels like training to be capable, not a scary lecture.

Is it teaching?

Yes, the core child-protection curriculum: safe vs unsafe touch, healthy vs unsafe secrets, a trusted-adults network, "No, Go, Tell", tricky-people awareness, getting help when lost, and online safety, all empowering and rehearsal-based.

The belief it moves. From "only strangers are dangerous; keep secrets and obey grown-ups; telling is tattling; if something happens it's your fault" → "watch what people do not who they are; never keep an unsafe secret; I can say no and tell, and it's never my fault."

Same safety, new actions.

84 scenarios across six categories, India-grounded (Childline 1098; the known-person reality) and empowerment-first. Every one re-encoded to a typed v2 mechanic.

CATEGORY	N	LEAD MECHANICS	COVERS
Safe & unsafe touch	12	sort, branch, role-play	Safe/unsafe; private parts; stop means stop; never your fault.
Secrets & surprises	8	sort, spot, branch	Happy surprises vs unsafe secrets; "don't tell parents" red flag.
Trusted adults & telling	14	build, branch, role-play	Build a squad; No-Go-Tell; keep telling; never too late; 1098.
Tricky people	13	spot, branch, strike-rewrite	Behaviours not strangers; lures; family password; you can say no.
If I'm lost or in trouble	10	branch, spot, build	Stay put; safe helpers (uniform, nametag, parent-with-kids); plan.
Online safety basics	14	spot, branch, sort	Private info; people pretend; no photos/meet-ups; tell a grown-up.

A spot-the-trick scenario, verbatim.

```
hook: "Spot the tricky-person move."
scene:  "A grown-up asks YOU (a kid) to help find their puppy"  <- the trick
        "A grown-up asks another grown-up for directions"
        "A teacher helps the class line up"
why: "Safe adults ask other adults for help, not children."
```

What this game erases.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
Only strangers are dangerous.	Most harm comes from known people; watch behaviours.	Tricky-people approach.
Touch is "good" or "bad".	We say "safe / unsafe", so nothing feels like your fault.	Body-safety language.
You must keep every secret.	Never keep a secret about unsafe touch, always tell.	Secrets vs surprises.
You'll get in trouble for telling.	Telling is safe and brave; you won't be in trouble.	Disclosure research.
Telling is just tattling.	Telling to keep safe is brave, not tattling.	Telling vs tattling.
If something happens, the child is to blame.	It is never the child's fault.	Non-blame.
You must always obey grown-ups.	You can say no to anyone if it feels unsafe.	Empowerment.
Nice-seeming people are always safe.	Judge by what they ask you to do, not how they seem.	Grooming awareness.
People online are who they say they are.	People can pretend; keep private info private.	Online safety.
If it already happened, it's too late to tell.	You can always tell, even later.	Disclosure research.

The micro-loop.

1. **Hook.** Lensy recruits you: "Safety Squad, ready to train?".
2. **Play.** One of seven mechanics, led by deciding a dilemma, rotated.
3. **Practise.** Rehearse the move, say "No, Go, Tell", spot the trick, name who you'd tell.
4. **UN → RE moment.** On a myth, UN erases it and RE writes the truth ("only strangers" → "watch behaviours").
5. **Reassure.** Every unsafe scenario ends on "it's never your fault; telling works".
6. **Sticker.** The Safety Squad badge; GameDone records once.

Signature surfaces: the **trusted-adults squad builder**, the **No-Go-Tell drill**, and **spot-the-trick** scenes (offline & online). Calm-mode and quick exit always available; tone stays warm and capable, never alarming.

Empower, never frighten.

- **Register.** Ages 6-9: calm, confident, hero-team energy; the feeling is "I'm capable and not alone", never fear.
- **Safe/unsafe language.** Always "safe / unsafe", never "good / bad"; nothing framed as the child's fault.
- **No graphic content.** Body specifics stay at the g02 level (private = swimsuit); this node owns skills, not anatomy.
- **Tricky people, not stranger-fear.** Behaviour-based; acknowledges known-person risk gently without demonising all unfamiliar people.
- **Reassurance baked in.** Each unsafe drill resolves on "not your fault" and "telling helps".
- **Access.** Calm mode, quick exit, no jump-scares; Childline 1098 surfaced; co-play, audio-first; made-for-India helpers & contexts.

v2 schema, scorecard-gated.

- **gameld. safety-squad** — node.game === GameDone key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema**. Each scenario carries type + typed payload (branch.options, spot.scene, role-play.yourLine, sort.items/bins/key, strike-rewrite.myth, build.pieces/sequence, reflect.options). Reuses the shared templates from g09.
- **Scorecard-gated**. Passed all eight checks (7 mechanics, max 25%, 0% binary, 32 autonomy, 13 UN→RE, 7 personas, 100% completeness). Re-run score_gdd.py on any edit.
- **Cross-links**. Builds on g02 (consent, private parts); feeds Ch.3 Boundary Bot (g15) and Firewall (g40, online).
- **Generated path**. Label/order/thread changes flow through the xlsx + gen-path, never hand-edited path.ts.

Ethics contracts (never traded for engagement): empower never frighten; "safe/unsafe" not "good/bad"; never imply child fault; no graphic content; tricky-people not stranger-fear; always end on reassurance; surface Childline 1098; made-for-India.

Why this works.

- **Most harm is from known people.** The large majority of child sexual abuse is by someone known and trusted, so effective programmes teach "tricky people" (watch behaviours) over "stranger danger", and frame touch as "safe / unsafe" to remove blame.
- **Skills, rehearsed, not lectured.** Children 6-9 learn safety through concrete examples, role-play and repetition; key parts are a trusted-adults network ("keep telling"), "No, Go, Tell", and the surprise-vs-secret distinction.
- **Empower, localise help, extend online.** Body-safety education works best when it builds confidence, not fear; in India, Childline 1098 is the child help number, and the same private-info rules apply online and off.

Citations accompany each scenario in the library JSON. Retrofit 9 of 9 complete, all nine pre-protocol libraries (g01-08, g37) are now v2 and scorecard-clean, joining g09. The full reworked set scores 10/10 PASS.
