

GDD 10 Fair Play World

Everyone gets a fair turn

The fairness game for ages 6-9, built to the mechanic-embodiment standard. Children decide real fairness dilemmas, share chores and chances by turns not gender, learn fair can mean meeting needs, and stand up to unfair rules. Eight mechanics, thirty-three real-choice moments, zero "tap the right card". Scorecard: passed.

Everyone gets a fair turn.

Fair Play World is the fairness game in the Gender & Respect thread: children learn that fair means everyone gets a turn or what they need, that chores and chances should be shared by turns not by gender, that fairness sometimes means meeting different needs, and how to stand up when a rule is unfair. It builds on What Makes Me, Me (g07) and takes direct aim at India's biggest everyday childhood unfairness, the gender chore gap. New v2 build to the persona-and-research standard.

Made for the justice-seeker.

From the Chapter 2 personas. This game was practically written for Ananya, and gives every child the words and moves to make things fair.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Ananya, 8 (justice-seeker, anchor)	"A dilemma where she decides what's fair", and words for the unfairness she feels at home.	branch: she decides; strike-rewrite: "chores are girls' work".
Sunita's household (joint family)	Fairness "dadi can nod to": everyone helps.	sort + build: rotate chores by turns.
Reyansh, 7 (peer-driven)	A calm comeback to "girls can't".	role-play: "anyone can, let's give it a fair go".
"Faizan"-type	To back up a friend shut out unfairly.	branch: ally moves.
Kabir-type (different means)	To see fairness as meeting needs, kindly.	branch + sort: equity scenarios.

Why this works (the evidence). Fairness reasoning matures at 6-9: kids move from simple equality to equity (everyone gets what they need) and begin to overcome in-group bias, the perfect window. And there's a known gap between knowing the fair-sharing norm and following it when it costs you, so the game has children decide and act fairly, not just agree.

Eight moves, one world.

The rework's heart: fairness arrives through eight actions, led by deciding real dilemmas (Ananya's "let me decide what's fair"). Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE CHILD DOES	EMBODIES	N
branch (dilemma)	Decides the fair move in a real situation, sees the result.	Justice reasoning; deciding fairness.	25
reflect	Names what feels fair/unfair and what to change (no wrong answer).	Justice sensitivity; agency.	19
strike-rewrite	Erases an unfairness myth ("chores are girls' work").	Conceptual change.	12
sort	Sorts fair vs unfair; equal vs equity.	Telling fair from unfair.	10
role-play (voice)	Says the fair-ask or the calm comeback.	Assertion; standing up.	8
match	Matches a situation to its fair fix.	Fair solutions.	4
build	Builds a fair chore chart / fair rules.	Fair systems, made concrete.	3
spot	Finds the unfair rule or assumption.	Spotting unfairness fast.	3

33 of 84 moments are branch or role-play, fairness is something you decide and do. Binary "tap the right answer": **0%.**

The two-test, passed.

Is it fun?

It plays like running your own "Fair Play World": you make the calls, watch the ripple, set the rules, and win the satisfying feeling of putting something right. The dilemmas have real, relatable stakes (the swing, the chores, the team captain), and there's a delicious justice-buzz when an unfair rule gets flipped, exactly what Ananya stays for.

Is it teaching?

Yes, fairness as gender equality: what fair means, sharing chores and opportunity by turns not gender (with India's chore gap named), equality vs equity (fair can mean meeting needs), and how to spot and stand up to unfair rules, all decided and rehearsed.

The belief it moves. From "fair means I get my way; chores are girls' work; boys get first chance; unfair rules can't change" → "fair means everyone gets a turn or what they need, chores and chances are shared by all, and I can help change what's unfair."

Built, not bolted on.

84 researched scenarios across six categories, India-grounded (the girls' chore gap; festival prep; family opportunity) and equity-aware. Full library in the companion JSON.

CATEGORY	N	LEAD MECHANICS	COVERS
What fair means	12	sort, branch, reflect	Everyone gets a turn/share; fair vs "my way"; rules can change.
Sharing chores fairly	15	strike-rewrite, branch, build	Chores aren't girls' work; the India chore gap; rotate by turns.
Fair opportunity	12	branch, sort, role-play	Who gets to play, lead, learn; equal chances; family opportunity.
Fair isn't always "the same"	8	branch, sort, match	Equity: meeting different needs; help & access for all.
Standing up to unfairness	16	spot, branch, role-play	Spot unfair (gender) rules; speak up; ally; give up an unfair perk.
Fair at home, school & play	12	branch, sort, role-play	Fair shares at home; no cheating; kind winners; fair turns.

A branch scenario (Ananya decides), verbatim.

hook: "Your brother plays while your sister does all the housework."
 option A "Say 'let's all take turns with the chores'" -> shared, fair, faster [best]
 option B "Let it carry on" -> one kid carries it all
 debrief: "In India, girls do about 40% more chores than boys, sharing fixes that."

What this game erases.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
Fair means I always get my way.	Fair means everyone gets a turn or a share.	Fairness development.
Chores are girls' work.	Everyone shares the chores, whatever their gender.	India chore gap.
Boys shouldn't have to help at home.	Boys help at home just like everyone.	Gender-equal caregiving.
Boys get first chance at the best opportunities.	Everyone deserves a fair chance, regardless of gender.	Gender equality.
Girls don't need the same chances.	Girls deserve exactly the same chances to learn, lead, dream.	Gender equality / India.
Fair always means exactly the same.	Sometimes fair means giving people what they each need.	Equity.
Unfair rules can never be changed.	People can change unfair rules to fairer ones.	Rights / agency.
Standing up for fairness is causing trouble.	Standing up for fairness is making things right.	Values.
Unfairness to others is none of my business.	Fairness is everyone's business; you can help.	Solidarity.

The micro-loop.

1. **Hook.** Lensy: "welcome to Fair Play World, you make the call".
2. **Play.** One of eight mechanics, led by a fairness dilemma, rotated.
3. **Ripple.** A branch choice shows the fair (or unfair) result, with a debrief, no buzzer.
4. **UN → RE moment.** On a myth, UN erases it and RE writes the truth ("chores are girls' work" → "everyone shares").
5. **Apply.** Build a fair chart, say the fair-ask, or spot the unfair rule.
6. **Sticker.** The Fair Play champion badge; GameDone records once.

Signature surfaces: the **fairness dilemma cards** (decide, see the ripple), the **fair chore-chart** builder, and a **spot-the-unfair-rule** scene. Co-play prompts open a real family chat about sharing.

Fair, not preachy.

- **Register.** Ages 6-9, never babyish; empowering justice-buzz; Lensy poses the dilemma, the child decides.
- **Decide, not be told.** Fairness is reasoned out through choices, not delivered as a moral; multiple good moves where they exist.
- **India-grounded, family-safe.** The chore gap is named plainly, but framed as "everyone helps the family", so it lands across joint families (Sunita's "dadi nods").
- **Both directions.** Frees girls toward chances/leadership AND boys toward home help; no gender is the "villain".
- **Equity handled gently.** "Fair can mean different help" via concrete kid examples (the box-to-see-over-the-wall), never abstract.
- **Access.** Audio-first, offline, low-data; co-play; India homes, names and contexts.

v2 schema, scorecard-gated.

- **gameld. fair-play-world** — node.game === GameDone key === registry id (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema.** Each scenario carries type + typed payload (branch.options, sort.items/bins/key, strike-rewrite.myth, role-play.yourLine, match.pairs, build.pieces, spot.scene, reflect.options). Reuses the shared templates from g09.
- **Scorecard-gated.** Passed all eight checks (8 mechanics, max 30%, 0% binary, 33 autonomy, 12 UN→RE, 6 personas, 100% completeness). Re-run score_gdd.py on any edit.
- **Cross-links.** Builds on g07; pairs with Not Fair, Not Funny (g11, unfair "jokes") and Can-Do Kids (g05, chores).
- **Generated path.** Label/order/thread changes flow through the xlsx + gen-path, never hand-edited path.ts.

Ethics contracts (never traded for engagement): decide not lecture; name the chore gap, frame as "everyone helps"; both directions; equity handled gently & concretely; no gender villains; made-for-India.

Why this works.

- **Fairness reasoning matures at 6–9.** Children shift from simple equality to equity (everyone gets what they need) and begin overcoming in-group bias in this band, so it's the right window to teach fairness as more than "same for me".
- **Knowing isn't doing.** There's a documented gap between endorsing fair-sharing and following it when it costs you, so the game has children practise deciding and acting fairly, not just agreeing in the abstract.
- **India's childhood chore gap.** Girls in India do roughly 40% more household work than boys, driven by gender norms (not economics), which curtails their schooling and later earnings, the concrete unfairness this game targets and helps families rebalance.

Citations accompany each scenario in the library JSON. 11 games now v2 (10 Ch.1-2 built games + this). Next in Chapter 2: Not Fair, Not Funny (g11), Smart Screen Heroes (g12), Heart Smart (g41).
