

GDD 24 Green Light / Red Light

Read any relationship

The teen flagship, and SwipeEd's namesake swipe game. Card after card, teens swipe right for a green flag, left for a red, and build real fluency at reading any relationship, friend, family or romantic, plus the FRIES model of consent. Seven mechanics, 28 flag-reads, zero "tap the right card" monotony. Scorecard: passed.

Read any relationship.

Green Light / Red Light is the flagship of the whole app, the title that named SwipeEd. It's a swipe game about reading relationships: card after card, a teen meets a moment of someone's behaviour and swipes right for a green flag (healthy) or left for a red flag (unhealthy or unsafe), building real fluency at telling a caring relationship from a controlling one. It is grounded in the One Love Foundation's signs of healthy and unhealthy relationships and the FRIES model of consent, and it deliberately covers all relationships, friendship, family and romantic. New v2 build, deepening Boundary Bot (g15). Gated.

FIELD	VALUE
Node / gameld	g24 · green-light-red-light (confirm exact id against engine-host)
Chapter / ages	Chapter 4 · ages 12-15 · real / near-peer
Thread / topics	B · Safety, Consent & Boundaries · UNESCO 1.2, 4.2, 5.3, 7.1, 7.2
Prerequisite / builds on	g23 (Outbreak) · builds on g15 (Boundary Bot)
Gating	Gated (school-comfort toggle)
Schema / status	v2 · scorecard PASS the flagship, swipe-led.

choice & voice

0%

binary taps

Flagship swipe, done right. The namesake swipe (green flag / red flag) leads, but at exactly the 35% cap, surrounded by consent dilemmas, refusal role-plays and myth-flips, so the very game that could be a wall of binary taps instead clears the anti-monotony bar. Gated, non-explicit, and safeguarded: you're never to blame, and serious red flags (control, fear, coercion) route to a trusted adult or Childline 1098/112.

FRIES, and flags.

Consent is FRIES

Freely given

Reversible

Informed

Enthusiastic

Specific

Free of pressure; you can change your mind anytime; you know what you're agreeing to; an eager yes (silence isn't one); and yes to one thing isn't yes to all.

Read the flags (One Love)

Green flags (healthy)

- Respect, trust, honesty
- Comfortable, mutual pace
- Independence & other friends
- Equality; you're heard
- Kindness & real apologies

Red flags (unhealthy)

- Control & monitoring
- Possessive jealousy
- Isolating you from others
- Manipulation & guilt-trips
- Belittling; volatility

Why this works (the evidence). Real consent is FRIES, freely given, reversible, informed, enthusiastic and specific, so silence or a pressured "yes" isn't consent. Healthy relationships show respect, trust, equality, kindness and independence; unhealthy ones show control, jealousy, isolation and manipulation (One Love), and these flags appear in friendships and family, not only romance. Being pressured or harmed is never the target's fault, and serious red flags are reasons to reach a trusted adult.

Seven moves, led by the swipe.

This is the namesake swipe game, so **swipe** rightly leads, the green/red flag read, but capped, with **branch** consent dilemmas and **role-play** refusal/voice giving it depth. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE TEEN DOES	EMBODIES	N
swipe (flag read) signature	Reads a behaviour and swipes green (right) or red (left).	Fast cue recognition, the flagship.	28
branch	Decides in a consent or relationship dilemma.	Autonomy; consequence.	13
strike-rewrite	Flips a consent or 'jealousy = love' myth.	Conceptual change.	12
role-play (voice)	Says a clear no, hears a no, checks "is this okay?".	Refusal; respecting refusal.	12
sort	Sorts consent vs not; green vs red; serious vs normal.	Judgement.	9
reflect	Considers their own flags and what they deserve.	Self-application.	8
spot	Spots red flags hidden in a 'romantic' message.	Inoculation.	2

Swipe at 33% (under the 35% cap), 25 branch/role-play. Binary "tap the right answer": **0%**, swipe is a rich cue-read, not a yes/no tap.

The two-test, passed.

Is it fun?

Green Light / Red Light is the addictive, satisfying core of the whole app: a fast, roguelike run of swipes where each card is a real relationship moment and your gut judgement gets sharper card by card. Between runs, the consent dilemmas and refusal role-plays slow the tempo and deepen it, so it's a thumb-flicking game with a spine of real skill.

Is it teaching?

Yes, relationship literacy and consent: how to read green and red flags in any relationship, that control isn't love, and the FRIES model, only a free, reversible, enthusiastic, specific yes is consent, plus how to give a no, hear a no, and get help when a line is crossed.

The belief it moves. From "no 'no' means yes; jealousy and control mean love; you can't change your mind; their anger is your fault; red flags only matter in dating" → "only a free, enthusiastic yes is consent; control isn't love; I can change my mind anytime; I'm never to blame; I can read the flags in any relationship."

Built, not bolted on.

84 researched scenarios across the consent → green → red → read-any → voice → safety arc, grounded in One Love and FRIES. Full library in the companion JSON.

CATEGORY	N	LEAD MECHANICS	COVERS
What consent is (FRIES)	14	strike-rewrite, sort, branch	Free, reversible, informed, enthusiastic, specific; everyday too.
Green flags	14	swipe, sort, reflect	Respect, trust, independence, equality, kindness, accountability.
Red flags	16	swipe, strike-rewrite, spot	Control, jealousy, isolation, manipulation, belittling, intensity.
Read any relationship	15	swipe, branch, sort	Mixed flags across friend, family, crush, online; act on them.
Say it & hear it	14	role-play, branch	Give a clear no; respect a no; check in; reversible right.
When a line is crossed	11	branch, role-play, strike-rewrite	Coercion, fear, never your fault; tell a trusted adult; helpline.

A green/red swipe pair + a consent flip, verbatim.

swipe: "They respect your 'no' without sulking or punishing you" -> right (Green flag)
 swipe: "They check your phone and want to know where you are all the time" -> left (Red flag)

flip: "If someone doesn't say no, that means yes."
 UN -> "No 'no' means yes."
 RE -> "Only a free, clear yes is a yes; silence or freezing isn't consent."

What this game flips.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
No 'no' means yes.	Only a free, clear yes is a yes; silence isn't consent.	FRIES / enthusiastic.
Once you say yes, you can't change your mind.	Consent is reversible, you can change your mind anytime.	FRIES / reversible.
A pressured yes still counts.	Consent must be freely given; pressure makes it not real.	FRIES / freely given.
Jealousy and control mean they love you.	Control isn't love; trust and freedom are.	One Love.
Their anger is your fault.	People own their own behaviour; you don't 'make' mistreatment.	No self-blame.
Red flags only matter in dating.	Control and manipulation are red flags in any relationship.	All relationships.
If something bad happened, you led them on.	Only the person who crossed the line is responsible.	No victim-blaming.
Leaving an unhealthy relationship is failure.	Choosing to leave what harms you is strength.	Self-respect.

The micro-loop.

1. **Hook.** Lensy: "every relationship sends signals, green or red?".
2. **Play.** A roguelike run of flag swipes, broken up by a consent dilemma, a refusal role-play or a myth-flip.
3. **Read it.** Each swipe sharpens the green/red instinct; a debrief names the sign.
4. **The flip.** On a myth, UN strikes it and RE writes the truth ("jealousy = love" → control isn't love).
5. **Voice & safety.** Practise a clear no and hearing a no; serious red flags surface a trusted adult and Childline 1098/112.
6. **Sticker.** The flag-reader badge; GameDone records once.

Signature surface: the **swipe deck** of relationship cards, the app's defining interaction, paired with the **FRIES consent** beats. This is the reference for Consent For Real (g44) and the relationship thread; the flag-reader is reused wherever relationships are judged.

Real, gated, safeguarded.

- **Register.** Ages 12-15, real and near-peer; matter-of-fact about consent and relationships, never preachy or explicit.
- **All relationships.** Friendship, family and romantic, so it's useful and appropriate for every player, romantic kept age-right (crushes, early feelings).
- **Consent is FRIES.** Only a free, reversible, informed, enthusiastic, specific yes; silence and pressure are never consent.
- **Never to blame.** Being pressured or harmed is always the other person's responsibility, never the target's.
- **Safeguarding.** Serious red flags, control, fear, coercion, threats, route firmly to a trusted adult and Childline 1098/112.
- **Gated.** Behind the school-comfort toggle; respects family and school readiness.
- **Access.** Audio-first, private, offline; India-grounded; builds on Boundary Bot (g15), sets up Consent For Real (g44).

v2 schema, scorecard-gated.

- **gameld. green-light-red-light** — `node.game === GameDone key === registry id` (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema.** type + typed payload; the **swipe** renderer (cue + left/right + answer) is the signature deck, with **branch** and **role-play** for consent and voice.
- **Anti-monotony, by design.** Swipe is capped at the 35% scorecard ceiling and is a rich cue-read (0% counts as binary), proving the namesake mechanic can pass the \$7 bar.
- **Fact-checked content.** One Love signs and the FRIES model verified; help-resources (Childline 1098/112) verified; flag edits for re-verification.
- **Scorecard-gated.** Passed all eight checks (7 mechanics, swipe at 33%, 0% binary, 25 autonomy, 12 UN→RE, 4 personas, 100% completeness). Re-run `score_gdd.py` on any edit.
- **Tracked.** `sync_master_tracker.py` marks g24 v2 PASS in the Master Node Table.
- **Generated path.** Label/order/thread changes flow through the `xlsx` + `gen-path`, never hand-edited `path.ts`.

Safety contracts (never traded for engagement): consent is FRIES; control isn't love; all relationships; never blame the target; serious red flags route to help; gated and non-explicit; made-for-India.

Why this works.

- **Reading flags is a learnable, repeatable skill.** Because fluency at telling caring from controlling comes from many quick, varied judgements, the swipe deck, card after card, is the ideal trainer, and capping it keeps the run fresh rather than rote.
- **FRIES makes consent concrete.** The five pillars turn a fuzzy word into clear tests (free, reversible, informed, enthusiastic, specific), which the consent dilemmas and refusal role-plays let teens actually practise.
- **Flags span all relationships, and safety leads.** Because control and manipulation appear with friends and family too, the game covers all relationships, and routes the serious red flags to real help, with the firm message that harm is never the target's fault.
