

GDD 45 Swipe Right?

Meet safely. Treat people like people.

The College node on modern dating (ages 18-22). Dating now runs on apps and DMs, with new freedoms and new risks: catfishing, ghosting, first-meet safety, and the easy slide into treating people as disposable profiles. It teaches meeting safely, reading honesty online, handling rejection both ways with decency, and carrying consent and respect from the first swipe. Practical safety, never fear. Even-handed across genders and orientations. Seven mechanics, 28 choice-and-voice moments, zero "tap the right card". Scorecard: passed.

Apps and DMs, done well.

Swipe Right? carries the relationship thread into adult dating. For most young adults dating now begins on apps, which brings new freedoms and new risks: catfishing, ghosting, safety on first meets, and the easy slide into treating people as disposable profiles. It teaches meeting safely (public, told a friend, your own way home), reading honesty online (verify against fakes and scams), handling rejection, receiving and giving it, with decency, and carrying consent and respect from the first message. It is practical, never fear-mongering, and even-handed across genders and orientations. New v2 build, sitting between Consent, For Real (g44) and Real Relationships (g46).

FIELD	VALUE
Node / gameld	g45 · swipe-right (confirm exact id against engine-host)
Chapter / ages	Chapter 6 · ages 18-22 · adult / practical / wry
Thread / topics	D · Relationships · UNESCO 1.2, 4.3, 5.5
Prerequisite / builds on	g44 (Consent, For Real) · builds on g24, g40, g44 · precedes g46
Gating	Open · adult, comprehensive, ungated
Schema / status	v2 · scorecard PASS the modern-dating game.

Profiles are people. Decency and consent don't pause for apps. The new-to-adult-dating parts, meeting a stranger safely, spotting AI and catfish fakes, surviving and giving rejection, get the most attention, but the spine is simple: treat every match like a real person with feelings, be the person you'd want to match with, and carry the enthusiastic-yes standard from Consent, For Real into every chat and date.

App-native, learning for real.

From the Chapter 6 personas (18-22). Young adults meeting dating, often hidden from family, for the first time and for real. It must give practical safety without moralising, and be decent and inclusive across every gender and orientation.

PERSONA	WHAT THEY NEED HERE	THE MECHANIC THAT SERVES IT
Ananya, 19	To meet a match safely, public, told a friend, her own way home.	branch + sort: meeting safely.
Rohan, 20	To handle rejection and not ghost; honesty both ways.	strike-rewrite + role-play: date with respect.
Zoya, 21	Dating that's decent and inclusive across orientations.	sort: profiles are people.
Meena, 20	To know help exists, offline, with no warden or counsellor.	match: report routes.

Why this works (the evidence). Dating now begins on apps, so realistic expectations (a profile is a highlight reel, matching owes nothing, rejection is normal) and in-person safety (public, tell a friend, own transport, stay sober, trust your gut, video-verify) are the core, with around half of online daters reporting a negative safety or privacy experience. AI and catfish profiles are more sophisticated, so a live video call is the reliable check, and romance scams follow fast-love-then-money, so be skeptical of quick declarations and any money ask. Honesty runs both ways: ghosting and leading-on isn't okay, and a brief, kind sign-off is decency. Consent and respect carry from the first message, even-handed across genders and orientations; in India, where dating is often hidden from family, tell a trusted friend even if not family.

Seven moves, led by the call.

It's an applied-dating game, so **branch** leads (read the situation, choose the safe, respectful move), with **strike-rewrite** clearing the dating myths and **role-play** giving the words, to set up a safe meet, to end things kindly, to take a no. Mechanics rotate; the same one never runs twice in a row.

MECHANIC	THE YOUNG ADULT DOES	EMBODIES	N
branch (the call) <i>signature</i>	Reads a dating moment and chooses the safe, respectful move.	Applied judgment.	19
strike-rewrite	Busts a dating myth ("if photos look real, they're real").	Conceptual change.	15
sort	Sorts safe vs risky; honest vs not; person vs disposable profile.	The line.	15
reflect	Internalises realistic expectations and decency.	Values.	13
role-play (voice)	Sets up a safe meet; ends a chat kindly; takes and gives a no.	Voice; decency.	9
spot	Spots the catfish, the scam tell, the respectful opener.	Reading the signs.	8
match	Pairs an issue to a helpline; a safety step to what it protects.	Connections.	5

28 of 84 moments are branch or role-play. Binary "tap the right answer": **0%**.

The two-test, passed.

Is it engaging?

Game feel is the wry, recognisable comedy and drama of modern dating, the perfect-then-pushy match, the ghost, the too-good-to-be-true profile, named and handled with a knowing smile. The satisfaction is competence: feeling genuinely equipped to meet someone safely, see through a fake, and end things like a decent human. Sam is a dating-wise adult friend, never a guide; the tone is adult-to-adult, practical and never preachy, and Get Help is one tap away.

Is it teaching?

Yes: using dating apps with realistic expectations and good digital boundaries; meeting a match safely (public place, told a friend, your own way home, sober, trust your gut, video-verify); spotting catfishing, AI fakes and romance scams; handling rejection, receiving and giving it, with respect; and carrying consent and kindness from the first message, even-handed across genders and orientations.

The belief it moves. From "a profile shows who someone is; if the photos look real, they're real; ghosting is fine; on apps the rules of respect don't apply; meeting a stranger needs no precautions" → "a profile is a highlight reel and a live call verifies; fast-love-then-money is a scam; a kind sign-off beats ghosting; profiles are people; and a few safety steps let you date freely."

Built, not bolted on.

84 researched scenarios across the dating-now → meeting-safely → fakes-and-ghosts → date-with-respect → profiles-are-people → tools arc, evidence-based and India-grounded, practical and non-explicit. Full library in the companion JSON.

CATEGORY	N	LEAD MECHANICS	COVERS
How dating works now	14	strike-rewrite, sort, reflect	Apps, matching, realistic expectations, healthy use.
Meeting safely	16	branch, sort, role-play	Public, tell a friend, own transport, sober, trust your gut.
Fakes & ghosts	16	strike-rewrite, spot, branch	Catfish/AI, romance scams, verify; ghosting isn't okay.
Date with respect	16	branch, role-play, reflect	Pacing, consent, rejection given and received kindly.
Profiles are people	12	sort, reflect, branch	Decency doesn't pause for apps; inclusive respect.
Tools & help	10	match, sort, reflect	The meet-safe checklist; report routes; helplines.

The 'photos look real' flip + a meeting-safely branch, verbatim.

flip: "If their photos look real, they're real."
 UN -> "If their photos look real, they're real."
 RE -> "Photos can be stolen or AI-generated; a live video call is the reliable check."

branch: First in-person meet with an app match.
 best -> Pick a public place and tell a friend where you'll be.

What this game flips.

MYTH (UN ERASES)	TRUTH (RE WRITES)	BASIS
A profile shows what someone's really like.	A profile is a curated highlight reel; you learn someone over time.	Expectations.
If their photos look real, they're real.	Photos can be stolen or AI-generated; a live video call is the reliable check.	Catfish / verify.
Someone who falls for me this fast must be genuine.	Instant intense love from a stranger online is a scam tell, not romance.	Romance scams.
Ghosting is fine; you don't owe anyone anything.	A brief, kind 'this isn't for me' is basic decency; vanishing isn't.	Honesty both ways.
On apps, the normal rules of respect don't apply.	Profiles are people; consent, honesty and decency carry across every screen.	Respect online.
If you matched, you owe them a reply or a date.	Matching owes nothing; you can stop or change your mind any time.	No obligation.
On a date, the consent rules relax.	Consent and respect apply on every date, app or not.	Consent travels.
If an intimate image of you leaks, it's partly your fault.	Sharing an intimate image of you is abuse, on the person who shared it, never you.	Image abuse.

The micro-loop.

1. **Surface.** Sam (dating-wise friend) surfaces a real dating moment, a match, a message, a meet.
2. **Read & choose.** The young adult reads the cues and chooses the safe, respectful move (branch), or finds the words (role-play).
3. **The flip.** UN busts a dating myth; RE writes the realistic, decent truth.
4. **Verify & respect.** Verify against fakes and scams; carry consent and kindness from swipe one.
5. **Tools & help.** A meet-safe checklist and report routes; harassment and image-abuse route to help.
6. **Sticker.** The Dating-Smart badge; GameDone records once.

Signature surface: the **meeting-safely read** and the **verify-the-real-one** move. It carries Green Light / Red Light's flag-reading (g24) and Firewall's online-safety (g40) into adult dating, with Consent, For Real (g44) underwriting respect, and sets up the healthy relationships of Real Relationships (g46).

Practical safety, never fear.

- **Safety-first, not fear-mongering.** Meeting guidance is practical and empowering (public, tell a friend, own transport, sober, trust your gut), framed as how you date freely.
- **Consent & respect carried.** The enthusiastic-yes standard from Consent, For Real (g44) and Mutual (g31) runs throughout; non-explicit.
- **Honest about risks.** Catfishing, romance scams, ghosting and image-based abuse are named plainly, with verification and reporting as the answers.
- **Even-handed & inclusive.** Decent and safe across all genders and orientations; no fetishising, no slurs.
- **No victim-blaming.** Being catfished, scammed or having an image shared is on the person who deceived or abused, never the target; help exists.
- **Routing to help.** Harassment, blackmail and image-based abuse route via the shared "get help" component to cybercrime 1930 and 1098 / 181.
- **Access & privacy.** Self-directed, audio, offline, low-end build; the Q&A is on-device and never identity-linked (DPDP-aligned).

Get help (India). Image-based abuse, blackmail or a leaked intimate image, report at cybercrime.gov.in or the helpline 1930 · harassment or threats, 1098 / 181 · immediate danger, 112 · and tell a trusted friend your plans. If someone shared an intimate image of you, it's abuse and on them, not your fault. Even-handed across genders and orientations.

v2 schema, scorecard-gated.

- **gameld. swipe-right** — `node.game === GameDone key === registry id` (confirm exact id in engine-host).
- **v2 mechanic-embodiment schema**. `type + typed payload`; the **branch** dating call leads, with **strike-rewrite** flipping the myths.
- **Safety & accuracy**. Meet-safe guidance, verification-as-defence, romance-scam pattern and India routes (1930 / cybercrime.gov.in, 1098 / 181) flagged for safety review and kept current as apps and scams evolve.
- **Fact-checked content**. Live-video verification against AI/catfish, fast-love-then-money scams, ghosting-isn't-okay and image-abuse routing verified this build; re-verify as the landscape shifts.
- **Scorecard-gated**. Passed all eight checks (7 mechanics, top mechanic at 23%, 0% binary, 28 autonomy, 15 UN→RE, 7 personas, 100% completeness). Re-run `score_gdd.py` on any edit.
- **Help-resource hook**. Harassment and image-abuse route via the shared "get help" component (1930 / 1098 / 181 / 112 / trusted friend).
- **Tracked**. `build_gate.py` finalize advances g45 to v2 PASS only after order, read, score, audit and artifact gates pass.

Ethics contracts (never traded for engagement): practical safety, never fear; consent & respect carried; honest about risks; even-handed & inclusive; no victim-blaming; routing to help; made-for-India.

Why this works.

- **Practical safety beats fear.** Because around half of online daters report a negative safety experience, concrete habits, public meets, telling a friend, your own transport, staying sober, video-verifying, are what let young adults date freely and safely.
- **Verification is the defence.** Since AI and catfish profiles are increasingly sophisticated and cannot pass a live video check, and romance scams run on fast-love-then-money, verifying and staying skeptical of quick love and money asks is the reliable protection.
- **Decency makes dating better.** Because profiles are people, carrying consent and kindness from the first message, and handling rejection gracefully both ways, is both the right thing and what makes dating healthier for everyone.
